Dealer Web Module

softtech
a COMPUSOFT company

For Dealers wanting to manage their own projects and sell complete whole units quickly and efficiently - without any need for Soft Tech V6 knowledge.

Web-based Application

Accessible online from desktop, laptop, tablet. It enables simple project management, quoting and ordering of windows and doors - whole units, fully fabricated, delivered to site, ready to install.

Pre-set Product Catalogue

Configure windows and doors by choosing from a pre-set suite of products as defined by the manufacturer. Suites are fully optioned allowing the user to quicky configure frames, validate engineering specs and pricing.

Interfacing

Behind the scenes; the Dealer Web Module interfaces with the Manufacturer's V6 application which provides the resources, engineering validation, and accurate pricing. V6 is a best in class fenestration application.
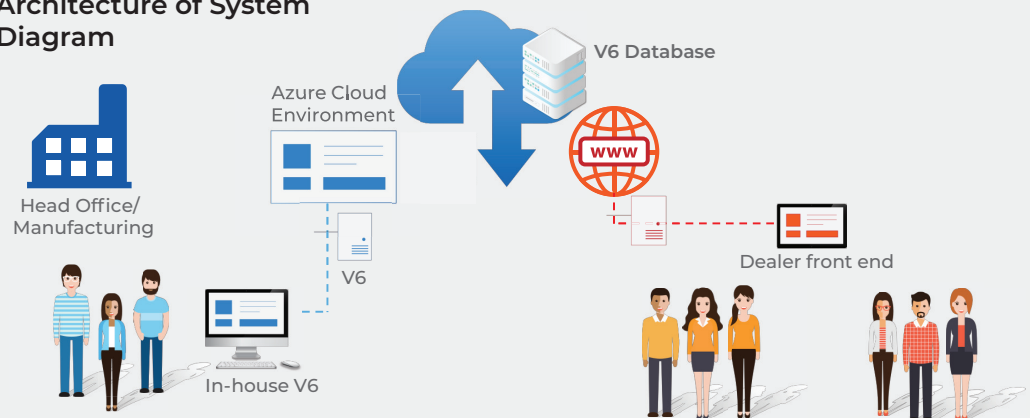

Production Scheduling

Once an order is submitted via Dealer web module, it will propagate the job automatically in to the manufacturer's V6 application to be scheduled for fabrication and delivery.
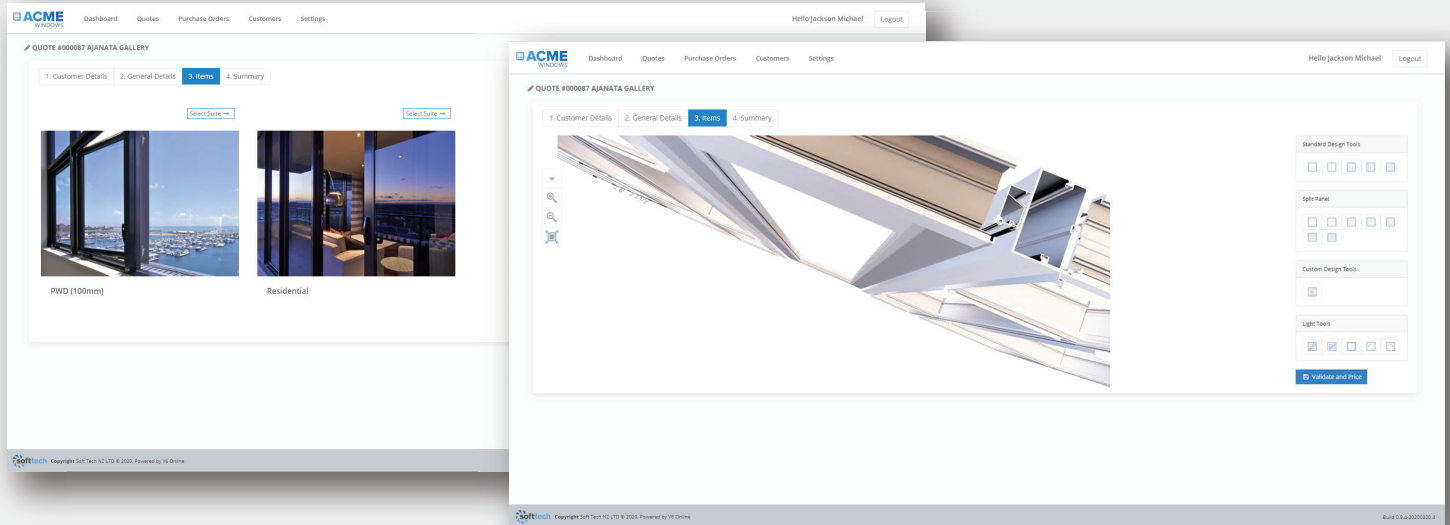

Management Tools

Dealers are provided with the tools to manage their own clients, contractors, staff, margins, discounts, projects, quotes and purchase orders, with real-time dashboard metrics.

Dealer Web Module - Dealer Quote Items

Benefits for the Dealer

- Provide a faster 'self-service' option to Dealers, allowing them to quote and place orders thus reducing current quoting/ordering time.
- Provide a new innovative look and experience for the Dealer, making it easier and more expedient for them to do business with the Manufacturer.
- Provide a complete front to back end system where the Dealer can management their clients, projects, quotes and purchase orders in one place.
- White labelled - Professional looking customer facing proposals (Dealer branded website).
- One system for managing projects, quotes and purchase orders
- Modern, responsive design to work on desktop web browsers and tablets .
- No specific browser plugins required – native HTML.
- Dashboard which is user specific showing insight reporting on financials, project progress, delivery schedules etc.

+ 3D Drawing board based configurator

- Configure frame designs through a 3D graphical web interface.
- Used for creating frames requiring complex customization and dimensioning, e.g. Low rise storefront.
- Real time 3D rendering.
- Leverages existing V6 product data
- High performance, designed for web and tablet.

Who is it suited to?

- Residential windows & doors, Aluminium, PVC, Timber and Steel.
- Basic Architectural Residential.
- Commercial aluminium windows and doors.
- Shop fitting and Storefront.
