

SynCut 150B

Synchronized cut-off saw to separate and divide profiles

APPLICATION

- separating and cutting of profiles made from wood and wood composites with small to medium dimensions
- comes with second transport belt for profile geometries that require additional stabilisation, like door casings
- also available without transport belt
- output increasing retrofit component for existing lines or final unit of a new line

HIGHLIGHT

highly dynamic and gentle on surfaces

YOUR ADVANTAGES

- high-quality cut
- works without profile clamping, no deformations, no marks on the décor
- cutting unit runs synchronised to the profile, cuts at full speed
- available as a retrofit component to existing wrapping lines
- control system recognizes cutting position automatically
- ideal cut also when separating low-weight work pieces
- up to 35 pulses /minute; works at up to 60 m/ min

REASON TO INVEST

great quality thanks to low tolerances and design without profile clamping
